NEW ANTHRACITE RECORD Production May Reach 70,000,-

Anthracite shipments in the first seven months of 1913 were more than 40,000,00) tons. It is probable, therefore, that this year's production of anthracite will exceed the high record of 1911, which was first seven months of 1913 were 40,339,703 tons as against 40,113,648 tons in 1911. The oduction during the last five months of the latter year was 29,840,651 tons. It he same rate of production is maintained

the mines were working under pressure after the suspension in the spring of that year, the shipments were 31,228,446 tons, and in 1910 they were 27,888,979 tons. so the shipments during the last five months of 1911 can be taken as a fair average of the production for the five closing
